## PROFILE

---

I'm a passionate web developer looking to combine my creativity and operations background in a collaborative environment. My experience in everything from the advertising world to playing in a band gives me the adaptability needed to work in a fast-paced workplace. I'm eager to learn, to lead, and to inspire.

## EXPERIENCE

---

### **DATADOG | *Solutions Engineer, Tier 2 Support* | New York, NY | January 2018-Present**

Datadog is a monitoring service for cloud-scale applications, providing monitoring of servers, databases, tools, and services, through a SaaS-based data analytics platform. I provide technical support to hundreds of companies, including many Fortune 500 brands and leaders in all industries.

- Provide real time technical assistance to developers (including executives and C-level)
- Contribute to code library and assist in enhancing features and squashing bugs
- Liaison between support team and engineer team, surfacing issues and collaborating on solutions

### **BLIPPAR | *Head of Operations, North America* | New York, NY | October 2013-May 2017**

Blippar is a visual discovery browser and augmented reality platform that allows users to learn more about the world by scanning their environment with their mobile devices. I headed operations across our 5 USA offices, key areas of responsibility being:

- Delivery Oversight & Quality Control
- Project Management and Liaison between Sales and Production; Revenue Generation & Forecasting

### **3RD WARD | *Director of Operations* | Brooklyn, NY | July 2011-October 2013**

3rd Ward was a massive arts and education center, holding dozens of monthly classes for hundreds of students and providing a valuable community center for makers and learners of all types.

- Contributed to an aggressive expansion program by performing financial analysis, reports & projections.
- Project managed new location openings and building renovations, and managed team of interns

## SKILLS

---

Web Development: HTML, CSS, Ruby on Rails, Node.js, Python, Express, PSQl, React, AWS, Angular, Docker

## WEB DEVELOPMENT PROJECTS

---

**MEDIADDICT** - A full stack app to track TV and movie consumption. Using React and Express, this app allows users to query TV and movie APIs, save their selections, and track their viewing history.

**PELS PIE CO. WEBSITE** - Built out the website for a local pie shop using HTML, CSS and Node.js. It includes an online ordering form (using Square API), plus an admin site to view event inquiries and manage inventory.

**BAND ESSENTIALS** - A full stack app for bands to keep track of their tour dates. Bands can create accounts; add, edit, and delete tour dates; and find breakfast, dinner, lunch, and snack options nearby each venue.

## EDUCATION

**University of Pennsylvania**, BA - Graduated Cum Laude

**Major:** Sociology, **Minor:** Economics

**General Assembly**, Web Development Immersive

## ADDITIONAL INFO

---

**Drummer in Husbandry**

- Founded and manages band
- Released 1 EP and 1 full length album
